

Qx5 COMPUTER MICROSCOPE

Explore the microscopic world with the only microscope that connects to a computer. Software lets you view, edit, animate and even measure samples, then create slide shows and videos. The microscope has the mobility to come out of its base for the viewing of larger or possibly live samples in their natural habitats.

Features

- ▶ Super-brite LED lighting for brighter, longer lasting top and bottom illumination
- ▶ Higher resolution (640x480) for more detailed images
- ▶ Video playback now three times faster at 15 frames per second
- ▶ Sample measurement tools built into the software
- ▶ Magnify objects and view them on your PC, at 10X, 60X, and 200X.
- ▶ Take snapshots, video, and time-lapse movies
- ▶ Manipulate images with drawing and painting tools
- ▶ Experiment with your creations using special effects and sound
- ▶ Share your discoveries through e-mail

Specifications

Magnification	: 10X, 60X, 200X
Light Source	: Twin "Suberbrite" LEDs
Resolution	: 640 X 480
Video Playback	: 15 Frames per Second
Software features	: Animation Video and Audio Editing Text and Labeling, Measurement tools, E-mail

Comes Complete With: QX5 Computer Microscope, USB cable, Stand, Specimen Jars, Sample Slide, Tweezers, Eye Dropper, Slide Clip, and Software CDROM
